Cresson, Texas

Testimonials

"In today's environment, having no control over who's fueling and how much is similar to leaving the cash register open and unguarded... DataPak provided us a simple solution to managing access and recording fuel use."

"My customers love having a simple and effective fuel management system on their bulk tanks. The FLOWrangler by DataPak is user friendly for all involved. DataPak helps me help my customers. That's value!"

"We're in the oilfield service business. DataPak's automated fuel management system is a simple, reliable product that takes the guesswork out of where our diesel is going. It works just fine in our 'roughneck world.'"

"With fuel rising from 4% of our cost structure to 18% along with a need to improve dispensing integrity over our 125+/- collection fleet, we found DataPak System to be the clear choice."

"We have different pumps throughout our operation, and DataPak is our 'universal remote' for controlling those pumps! We appreciate the simplicity and dependability of their FLOWrangler Automated Fuel Management Controllers."

"Fuel costs and equipment utilization are critical to our customers' cost of doing business. DataPak takes a genuine interest in our customers. Their simple, fuel management system has helped us to provide our customers with the ability to know when and where the fuel goes. No more writing off where it may have gone...!"

"We like the simplicity and dependability of the DataPak system. The thing I appreciate most is the 'round the clock' support."
